

Outdoor Camp Springstone – Extended School Year 2021
July 5th - July 31st
9am - 1pm

Join us for four weeks* as we explore problem solving and experiential learning!

As a cohort and with the guidance of our knowledgeable faculty, students will engage in trips to local nature areas for hiking and ecological thinking in the natural beauty of the East Bay!

In addition to hiking and exploring nature, students will engage in arts and crafts through outdoor learning, utilizing objects found in nature and incorporating it into their projects. We will also play games and work on making meaningful social connections with peers. Lunch will be eaten outside, and through this, continue to work on fostering relationships with both peers and staff. Students will keep a daily camp journal that reflects on their activities and experiences.

With faculty guidance, students will be required to follow multi-step directions and build executive functioning skills to complete each activity, both short and long term throughout the summer session. At the end of the summer session, they will have a memory book to keep!

Come join us for a summer of nature, learning, and fun!

*It is an option to join for two or three weeks of the summer session. Please be in touch with the administration to coordinate when your child will be joining Camp Springstone.
